Showing 66 series with status 'new', 'in progress'; updated between 2015-10-27 and 2015-10-01; submitted by Belen Barros Pena; assigned for review to Damien; with test result 'fail' Show all series

ID	Series title	Tests	Patch status	Patches	Reviewer	Submitter	Updated on
1140	Series starting with: [Intel-gfx,i-g-t] Copy gem_concurrent_all to gem_concurrent_blit	pass	Merged	3	None	David Weinehall	2015-10-27
606	Series starting with: drm/i915: Disable primary plane if we fail to reconstruct BIOS fb	warning		7	None	Matt Roper	2015-10-27
1112	drm/i915/bxt: Update Uninit sequence for DDI PHYs	fail	Rejected	1	None	Matt Roper	2015-10-27
1126	drm/i915/bxt: Added identifier for MIPI transcoder	pass	Under review	1	None	Animesh Manna	2015-10-27
1115	drm/i915/bxt: Allow/disallow DC5 based on DC9 entry/exit		New	1	None	Animesh Manna	2015-10-27
921	drm/i915: Skip fence installation for objects with rotated views (v2)		New	1	None	Vivek Kasireddy	2015-10-27
972	drm/i915: Ensure associated VMAs are inactive when contexts are destroyed	pass		2	None	Tvrtko Ursulin	2015-10-26
1084	drm/i915: make A0 wa's applied to A1	pass	Reviewed	1	None	tim.gore@intel.com	2015-10-26
1080	drm/i915/skl: Correct other-pipe watermark update condition check (v2)	warning	Needs work	1	None	Matt Roper	2015-10-23
1070	drm/i915: Add extra plane information in debugfs.	pass	Merged	1	None	Robert Fekete	2015-10-23
1068	drm/i915: Fix maxfifo watermark calc on viv cursor planes	pass	Merged	1	None	Thomas Daniel	2015-10-23

patchwork patch tracking system | about patchwork

The notification at the top of the page with the 'undo' option

Series highlighted. The highlight fades out after 5 seconds or so

Action feedback

When you carry out an action, and the action completes successfully, we tell you so by doing the following:

1. Deselecting all selected items (series, patches or bundles), and exiting the actions mode. This means the actions bar no longer shows, and we display the filters instead
2. Highlighting all items affected by the action with colour #d9edf7. The highlight should fade out after 5 seconds or so, and the fadeout effect should last about 1 second. These are just approximate timings: if they don't feel right, tweak them a bit.

The items affected by the action will be at the top of the table, since any action changes the 'updated on' field. To ensure this is the case, 'updated on' should be the only sortable column in tables. In the end, sorting patches or series by 'reviewer' or 'submitter' is not that useful: filtering by those is what you really want to do. If by any chance the 'updated on' filtering has been reversed, we should apply again the default filtering order (most recently updated item on top).

3. Showing a notification at the top of page. If and when we can, the notification should include an 'undo' option.

Patches Bundles About this project All projects

You have set the patch status of 4 series to **Merged** [Undo](#)

Patches Bundles About this project All projects

You have set the reviewer of 4 series to **Damien Lespiau** [Undo](#)

Patches Bundles About this project All projects

Your bundle [some/bundle](#) has been created. [Undo](#)

Patches Bundles About this project All projects

You have added 2 series to bundle [some/bundle](#) [Undo](#)

Patches Bundles About this project All projects

You have moved 2 series to project [Some project](#) [Undo](#)

Notification text

The text of the notification is different for each action, I'm afraid. Here comes a list for the actions we provide in the all series table:

- 1. 'Set patch status' action. The notification says: "You have set the patch status of <number\_of\_series> series to <new\_status>". The new status should be bold.
- 2. 'Set reviewer' action. The notification says: "You have set the reviewer of <number\_of\_series> series to <new\_reviewer>". The new reviewer should be bold.
- 3. 'Create bundle' action. The notification says: "Your bundle <bundle\_name> has been created". The bundle name is a link to the bundle details page.
- 4. 'Add to bundle' action. The notification says: "You have added <number\_of\_series> series to bundle <bundle\_name>". The bundle name is a link to the bundle details page.
- 5. 'Move to project' action. The notification says: "You have moved <number\_of\_series> series to <project\_name>". The project name should be a link to that project's series table.
